

Gas Engine Products

Replacement parts & accessories for gas engines

MOTORTECH

Motortech products deliver increased operational safety and better environmental impact through lower emissions. Suitable for gas generators, gas power generation and CHP power generation

spark plugs

Motortech design and manufacture specialist engine replacement parts and stationary gas engine accessories and equipment. The product family has a long-standing reputation for delivering increased operational safety and better environmental impact through lower emissions.

All products are high quality and manufactured to international standards ISO 9001. As a result you can be assured of the highest performance, reduced downtime and extended part life – all of which delivers improved engine cost-effectiveness.

Gas engine ignition

Motortech offers an extensive range of products for ignition of stationary gas engines. From conversions, control equipment to high-tension leads and coils - we can supply all the ignition products you will need.

- Ignition systems and conversion kits
- Ignition control equipment
- Ignition coils
- Ignition leads / high-tension leads
- Pickup / pickup leads
- Trigger discs and drives
- Ignition voltage measurement systems
- Timing light for shielded and unshielded high-voltage cables

Ignition kit

Ignition Controller 750

Gas regulation

Motortech products offer an advanced solution for emission regulation with lean mix emission controllers, gas air mixers and specialist testing equipment for accurate measuring of gas and air.

- Lean mix emission regulation
- Gas/air mixer
- Throttle valves
- Gas trains
- Test equipment

Test equipment

Varifuel

Gas engine & general accessories

Specialist accessories for stationary gas engines. These include lubricant level controllers, oil and air filters and catalytic converters.

Liquid - level controller

Industrial spark plugs & accessories

We can deliver a choice of high-quality industrial spark plugs from leading names including Champion, Denso, Beru and Stitt as well as a number of spark plug accessories and tools.

Cabling systems

Cabling systems are individually produced for most gas engines and cover a multitude of applications and include shielded and unshielded cable loops as well as complete cabling tracks.

Gas engine control

Motortech have developed effective and reliable solutions for gas engine control including co-generation management and temperature supervision.

- All-in-One gas engine management
The All-in-One solution helps you to remotely monitor, control, regulate and protect the system. All system performance data, histories and parameters are sent to you via a modem, internet or SMS service. This means you can noticeably improve control and management for your end customers.
- All-in-One gas engine management
- TempScan 8 temperature module

Detcon

Alongside the Engine Control Division, IPU Group offers a wide range of diesel engine products including: Fuel filtration systems, diesel engine pre-heating, noise reduction systems, engine shutdown solenoids and non-electric starting packages.

IPU GROUP ENGINE CONTROL DIVISION

IPU Group Engine Control division represents a wide range of essential electronic products and components for diesel and gas engines and their applications from stand by power generation, industrial engines, off-highway vehicles, construction machinery and marine engines. Our extensive product family includes multi-engine load sharing, power control solutions and generator controllers from GAC, ComAp, Datakom, Motortech and 42Technology - distributing equipment throughout the UK, Eire and across Africa.

Our engine control product portfolio includes:

- Electronic engine governing
- Generator control solutions
- Generator control panels
- Industrial engine control solutions
- Replacement parts and accessories for gas engines
- Specialised training
